

Michael's letter

Dear Mr Ferguson

I am one of your constituents. Last year my mother died as a consequence of a stroke.

The lack of government funding for stroke research and prevention in Australia is a terrible thing. Avoidable deaths and serious disabilities could be prevented, saving the taxpayer a lot of money in the long term. It's time to give stroke funding the priority it deserves.

Please get behind more funding for stroke research and prevention. Let's do the right thing by all those affected by stroke, and their families.

Yours sincerely
Michael
